(Puchong Perdana), Seksyen 1, 47100 Puchong, Selangor DE, Malaysia.

INTERNATIONAL AFFILIATIONS:

## INTRODUCTION

The mining and quarrying profession have always been viewed as a challenging career due to the nature of the work, the complexity and the risks involved in getting the job done. The need for a well-structured occupational safety and health training program in mining and quarrying industry thus need to be emphasised for efficient, safe and sustainable work environment. The industry workforce should thus be technically competent and well conversant in safety and health skills and work procedures in order to minimise accidents and occupational health issues.

Under Occupational Safety and Health (Amendment) Act 2022 (Act A1648), Section 29A, an employer with five or more employees at his place of work needs to appoint an employee as an occupational safety and health coordinator. This means every mining and quarry operator need to send their personnel to be trained as OSH coordinator. In addition, the mining and quarry industry is required to comply with the requirement of Mineral Development Act 1994 and Quarry Rules regarding safety issues under Department of Minerals And Geoscience.

With the above requirements, Institute of Quarrying Malaysia revamped and improved the previous OSH course. This improved course is tailor made for the mining and quarry industry to meet the requirement of OSH (Amendment) Act 2022, Mineral Development Act and State Quarry Rules. This is a 5 days course with 3 days for OSH Coordinator module and 2 days for mining and quarrying safety module with an assessment after each module.

This OSH Coordinator module has been sent to the Department of Occupational Safety and Health and waiting for approval. The other subjects on safety and health in mining and quarrying will meet the requirements of the Department of Minerals and Geoscience for the appointment of mine or quarry manager.

## COURSE CONTENTS

- 1) OSH Awareness
- 2) Legislations
- 3) OSH Management System
- 4) Chemical Handling
- 5) Occupational disease
- 6) Road safety
- 7) HIRARC
